# HOW THE PENGUINS SAVED CHRISTMAS

If you've used any of Teresa Jennings' K-4 musicals, you know how special they are. Her enchanting new creation is full of the great music and careful details that set her works apart. It is 15-20 minutes in length and features five memorable new songs. The story is simple, and though it is secular in nature, it teaches positive lessons to young performers. The cast includes a colony of penguins as well as Santa and his reindeer, so it is easily adapted for larger groups. The dialogue is built on short lines and the songs call for mostly group singing. The **Teacher's Handbook** contains much more than just the songs with playable

accompaniments. There are creative suggestions for costumes and staging, reproducible posters and program covers, and even background information on penguins and their habitat for interdisciplinary study. The professionally produced **Performance/ Accompaniment Cassette** features three full versions of the musical for maximum versatility in rehearsals and performances. We have combined the **Teacher's Handbook**, **10 Singers Editions** and the **Performance/ Accompaniment Cassette** into a money-saving **Performance Kit** for \$49.95. This musical gives you everything you will need to create an experience that your students will cherish for years to come. Available on or before June 30, 1991.
